ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

AGAIN REPRINTED

## DeLee's New Obstetrics

Reprinted *three weeks after publication*, this new work has *again been reprinted*. The cause of this success is obvious: It lifts the practice of obstetrics out of the rut it has been in for years. For the first time it records all those remarkable advances made in the practice of obstetrics. For the first time it considers childbirth as a *pathologic function*—not a physiologic one. "DeLee" is in the very truest sense a bedside obstetrics. It is a work that tells you and shows you exactly how to conduct a case from conception to end of puerperium, including all accidents and emergencies that could possibly occur. "DeLee" shows you every step of the entire confinement. No other book does this. "DeLee" shows you every possible position for delivery. No other book does this. "DeLee" gives you points in diagnosis and treatment you cannot find in any other work.

*Dr. Clark E. Day, Indianapolis, Ind.*—"Dr. DeLee's work is by far the greatest on Obstetrics published to-day for the general practitioner. It will meet what is expected of it in a more concise and comprehensive way than any other book he could buy."

Large octavo of 1060 pages, with 913 illustrations, 150 in colors. By JOSEPH B. DeLEE, M.D., Professor of Obstetrics in the Northwestern University Medical School, Chicago.

Cloth, \$8.00 net; Half Morocco, \$9.50 net.
